## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Species III, claims 3 and 4 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### *Information Disclosure Statement*

2. The information disclosure statement filed 07/20/2000 has been considered.

### *Oath/Declaration*

3. The oath or declaration filed on 07/20/2000 is acceptable.

### *Claim Rejections - 35 USC § 112*

4. Claim 4 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not disclose the laser device comprising **both** a prism that has a **non-reflective portion and total reflecting portion** and a front mirror that has a **partial reflecting portion and a total reflecting portion** as recited in claim 4.

***Drawings***

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the laser device comprising **both** a prism that has a non-reflective portion and total reflecting portion and a front mirror that has a partial reflecting portion and a total reflecting portion as recited in claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Koepf (4,173,001).

Koepf discloses a laser device 10 including an amplifying section 12 in which a laser medium is amplified to oscillate laser light, comprising a prism 44 (34) having a non-reflecting portion 46 which is provided on approximately center portion and transmits the laser light at high transmissivity and a total reflecting portion 43 which is provided outside a perimeter of the non-reflecting portion 46 and reflects the laser light

at high reflectivity; wherein the prism 44 (34) separates part of the laser light oscillated in the amplifying section 12 and shapes a beam form of the laser light into a desired form to output the same. Note figures 1, 3, 4 of Koepf.
